DETAILED ACTION

Drawings

1. The drawings are objected to because it is difficult to read the text or numbers in figures 10a-10c, 13a-13c, 14a, 14b, 23a and 23b. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

Page 1 of the specification should be replaced with language in the "CONTINUATION DATA" of the Bibliography Data Sheet.

Numbering of figures in the specification should be changed according to the change to the drawing numbers made by applicant.

References on page 19-21 should be incorporated and inserted within specification.

Allowable Subject Matter

3. Claims 1-24 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art, Barnhill et al, U.S. Pat. No. 6882990 teaches classifier to produce a feature ranking with Support Vector Machine that produces examples that are closest to the decision boundary (see column 30, lines 52 and 53 and column 31, lines 4-6). The claimed invention recites repeating inputting, optimizing, computing and eliminating steps until a subset of features of pre-determined size remains (see claim 1). Therefore, the prior art (Barnhill et al) fails to teach or suggest repeating inputting, optimizing, computing and eliminating steps until a subset of features of pre-determined size remains.

Art Unit: 2129

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
